

FLUIDMATE

SMART LIQUID DISPENSING

A customisable, all in one device that combines internet connectivity with multimedia and fluid delivery.

MULTIPURPOSE DEVICE

FluidMate is for accurate fluid delivery of gels or liquids. With monitored fluid levels that can be combined with sensors and multimedia display.

DISPENSER ELECTRONICS

The electronic hardware, fluid delivery and cloud supported portal was developed for the Smart dispensing of liquids including hand sanitizer, soap, water, sunscreen and more. FluidMate has a built-in content display management controlled by Cloudtronics Cloud portal which houses the device settings and provides live statistic updates on fluid levels and maintenance of the machine. There are SMS and email alerts built into the system to assist companies and their users manage and maintain the daevices.
